Call for Sponsorship

The International Conference on Cryptographic Hardware and Embedded Systems (CHES) is an annual conference organized by the International Association for Cryptologic Research (IACR). It is the largest of IACR’s conferences and the leading conference on all aspects of cryptographic engineering. CHES attracts submissions and participants from both academia and industry and thus provides a valuable connection between research and engineering communities. For more information on CHES see [https://ches.iacr.org](https://ches.iacr.org).

From 2018, the publication model of CHES will move to a combined journal-conference model with papers submitted to the journal "Transactions on CHES" (TCHES). Papers accepted to TCHES will be presented at the conference.

In addition to a scientific program of around 30 technical presentations, CHES also includes the exhibition of cryptographic hardware, bespoke elements of security laboratories and security hardware modules. International experts are invited to give talks on hot topics and poster sessions complete the program.
